Original publisher: Maxwell Air Force Base, Ala. : USAF Counterproliferation Center, Air University, 2002 OCLC Number: (OCoLC)269367370 Subject: Bioterrorism -- Prevention. Excerpt: . . . Surveillance and Detection. . . 5 II. Local Disease Surveillance and Detection by Physicians The current system of medical response to a bioterrorism attack in the United States emphasizes the critical role of the first responders, the local emergency care systems, in the initial period of a biological attack. Knowing that a biological attack has occurred (detection) is the first challenge faced by first responders, since biological agents lend themselves to clandestine dissemination in the air, food or water supply. The release would most likely be unannounced by the attacker and would most certainly be undetected. For example, an airborne or aerosol release would produce a cloud that would be invisible, odorless, and tasteless. Depending on the biological agent used, no one would know until days or weeks later that anyone had been infected. This knowledge would come long after a considerable amount of damage had been done. It is highly probable that most victims of an unannounced...
