Read Books, United Kingdom, 2008. Paperback. Book Condition: New. 214 x 138 mm. Language: English . Brand New Book ***** Print on Demand *****.PREFACE TO FIRST EDITION The steel square is the carpenter's handbook, instructor, and tool without price. Without it he is just another hammer-and-saw man- a fellow who can hit a nail and saw to a line. The ability to make the lines is what constitutes the difference between a real craftsman and a hammer-and-saw man. It requires technical knowledge of a high order to make most of the lines, and without a steel square a carpenter would have to be an expert mathematician and understand the mysteries of geometry. The steel square brings him a knowledge of lines and angles in a simple and practical way. To watch an expert carpenter lay out the various cuts on the rafters and other members of a complicated roof structure is a joy. This book on the steel square tells the carpenter how to do it. It explains clearly, by means of illustrations and detailed instructions, the various markings which appear on the square, and the purposes for which they are used by the carpenter in the course of his daily work. Instruction is also given on the use of the square in the construction of the different parts of wood-framed buildings, including detailed information on the building of roofs. The laying out of the various cuts is illustrated in a step-by-step fashion which makes some of the most difficult operations seem easy. We feel sure that the book will prove an invaluable aid to the young carpenter who may have to rely entirely on what knowledge he can pick up in working as a helper with a man who knows. The expert carpenter is not always a good...
