*This publication will never be effortless to get started on reading through but very entertaining to read through. It normally is not going to expense too much. I discovered this publication from my dad and i encouraged this book to find out.*

Stanford University Press. Paperback. Book Condition: new. BRAND NEW, Files: Law and Media Technology, Cornelia Vismann, Geoffrey Winthrop-Young, Quod non est in actis, non est in mundo. (What is not on file is not in the world.) Once files are reduced to the status of stylized icons on computer screens, the reign of paper files appears to be over. With the epoch of files coming to an end, we are free to examine its fundamental influence on Western institutions. From a media-theoretical point of view, subject, state, and law reveal themselves to be effects of specific record-keeping and filing practices. Files are not simply administrative tools; they mediate and process legal systems. The genealogy of the law described in Vismann's "Files" ranges from the work of the Roman magistrates to the concern over one's own file, as expressed in the context of the files kept by the East German State Security. The book concludes with a look at the computer architecture in which all the stacks, files, and registers that had already created order in medieval and early modern administrations make their reappearance.
